## People

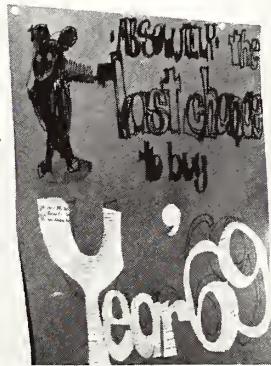

Every man works on his own jigsaw puzzle seeking harmony and fulfillment from complexity. Each intricate piece complements another in form and color; there is no piece too small, too obscure, nor too gnarled which does not, in some way, contribute toward the whole. The time each person spends piecing his puzzle together, the time taken to giggle, or work, or cry, is the time that makes each puzzle, each person, so important.

## Happenings

Many puzzle pieces come to us unexpected, some formed with sadness, some with relief, some with exuberance; however, there are many pieces that are constructed with purpose. Starting from a small scrap or a tiny idea, we begin to build, and snip, and mold a definite shape. This project is never individualized ... always done in the spirit of fellowship; it contributes a large bright kaleidoscopic section to each person's jigsaw puzzle.

## The Establishment

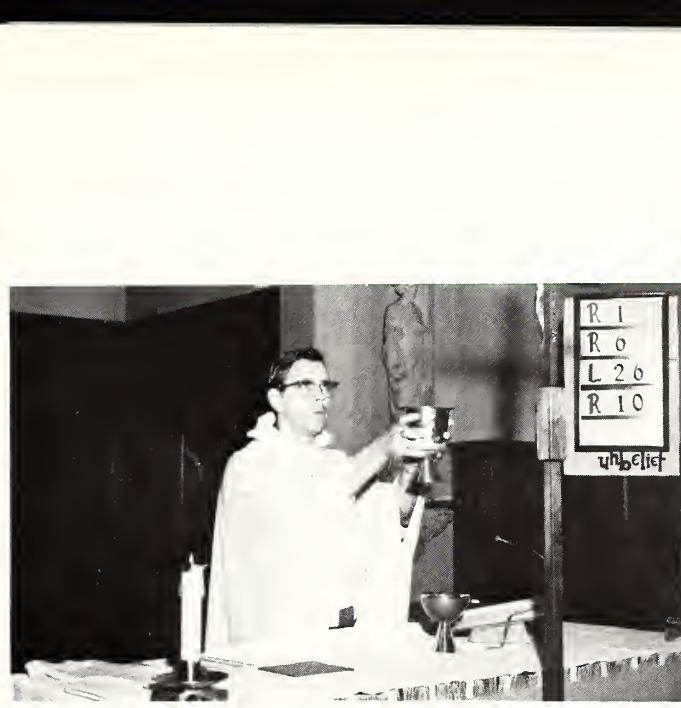

No matter how complex or simple a puzzle may be it needs some form of direction. Puzzled minds seek forms of positive movement and creative stimulation. For this the inexperienced seek out the experienced. Problems are discussed, probable solutions are suggested, direction and meaning are offered and the puzzle's garbled picture begins slowly to become a visual and understandable shape.

## Seniors

Just when one puzzle seems to near completion another puzzle emerges. Puzzles grow in complexity and meaning; however, some of us are experienced puzzle solvers. The time has come to take our experiences and aid others in their struggles; while our own life takes on a different direction as we continue our education, embark on a career, or begin to raise a family.
